

This publication is produced by Blyenburgh & Co for UVS International and is supplied free-of-charge. It has as purpose to help raise the level of global awareness relative to ongoing research & development, relevant technologies, production and sales, as well as current & future applications of unmanned vehicle systems (air, ground & naval). It has a controlled circulation of 7143 nominal addressees, consisting of UVS International members (2036), government (370), military (2067) & diplomatic corp (24) representatives, regulatory authorities (370), stakeholder associations (107) & researchers & academics (2169) in 69 countries involved with unmanned vehicles systems (status on July 19, 2008). As many of the defence industry and governmental recipients cannot access web sites from their office computers, this News Flash contains the entire text of the articles & press releases (and not links to them).

All recipients of the UVS News Flash are encouraged to supply UVS International with their press releases & announcements and to forward the UVS News Flash to their contacts & relations.

Recipients of this publication no longer desiring to receive it are requested to inform UVS International by email indicating «De-subscribe from News Flash» in the object box & indicating their complete name + affiliation in the email text.

Photographic Review of the UAS & UGVs Exhibited & UGV Demonstrations at the UVS Forum

The UVS Forum was organised by EUROSATORY in partnership with UVS International

The UGV demonstrations were organised in partnership with
the DGA (French Ministry of Defence Procurement Agency)
